

NIKOLAI BURNYSHEV

Java Developer

SUMMARY

Highly motivated and skilled 21-years old Java developer with about 3 years of industrial development and BSc in Computer Science. Worked in different teams, always helping to achieve the best possible solution in time and resources. Skilled in developing systems from scratch, maintaining complex high-load systems, building architecture, creating a software product development strategy.

EDUCATION

Higher School of Economics

Business Development Department

Master's Degree in Introduction of Innovation
2024 – 2026 (In progress)

Higher School of Economics

Computer Science Department

Bachelor's Degree in Software Engineering
2020 – 2024

MTS University

Middle+ Java Development Course
2023 – 2024

Tinkoff Education

Software Development Deeper Course
2020 – 2022

SKILLS

- Strong Java Core Knowledge.
- Spring Boot (MVC, Security, Data, JPA, AOP).
- Hibernate.
- SQL, PostgreSQL, MySQL, MariaDB; Flyway, Liquibase.
- JUnit, Mockito, Jacoco, Test Containers.
- AWS, Azure, Google Cloud.
- Kafka, RabbitMQ.
- Microservices.
- Git: Github, GitLab, Bitbucket, Gogs.
- Docker, Kubernetes, Jenkins, Ansible.
- Maven, Gradle, Ant.
- Apache Camel, Spring Integration.
- REST, SOAP, grpc.
- PMD, SonarQube.
- Swagger, OpenAPI.
- LDAP, AD, OpenID Auth.
- Design Patterns.

CERTIFICATIONS

- IELTS Academic; Score – 7.5.
- SQL Deeper course certificate – Stepic.org.
- Data Science course completion certificate – Coursera.

PROFESSIONAL EXPERIENCE

Middle+ Java Developer | System Architect

SberTech | March 2024 – Present | Moscow, Russia

- Developed architecture for dependency analysis project, currently leading the development process;
- Introduced project development rules, including working with Git, communication in the team and time evaluation.
- Developed key backend services for the project.
- Configured CI / CD processes for the project;
- Introduced new developers to the project and brought them into development process.
- Managing the allocation of resources for the development of the project.
- Integrating project into the ecosystem of corporate products.

Middle Java Developer

IntexSoft | May 2023 – March 2024 | Grodno, Belarus

- Worked on internal services, brought several of them into production.
- Worked on external project with 50+ microservices.
- Developed several backend modules completely on my own (analyzing calls, building connections).
- Worked with foreign clients and managers, conducted business communication in English.

Junior -> Middle- Java Developer

Doczilla | August 2022 – May 2023 | Moscow, Russia

- Worked on integration solutions for more than 15 clients: changing core functionality, changing API, customizing builds, developing Apache Camel solutions.
- Helped developing core functionality: shared access to the documents, shared disks, webSockets.
- Moved AI module from Node.js to Python, developing it in the process.

Junior Java Developer

iSavvy Education | August 2021 – March 2023 | Baku, Azerbaijan

- Worked in the team of 4 developers creating education platform based on Minecraft gameplay.
- Developed online-platform, integrated it with self-written Minecraft Launcher.
- Created the automation server for lesson appointments.
- Integrated ChatGPT in the game chat.
- Took part in several GameDev & EdTech conferences, selling the product and attracting attention.
- Held several meetings with investors as translator (ha-ha).
